# 3M™ Scott™ AV-3000 HT Facepiece

## 3M™ Scott™ AV-3000 HT Facepiece

Enhanced thermal performance.

The 3M™ Scott™ AV-3000 HT facepiece meets all requirements established in the NFPA 1981, 2018 Edition standard as a component of the SCBA, with advanced material technology to provide enhanced thermal durability and voice intelligibility performance for improved user safety.

### Lower Total Cost of Ownership

All AV-series facepieces are designed for Top-Down Convertibility. This means you can use a single facepiece with a single fit test for all of your NIOSH, CBRN and NFPA-approved respirators. (Some approvals pending.)

### High Performance Lens and Bezel

High performance materials in the lens and bezel meet the rigorous requirements laid out in NFPA 1981, 2018 Edition. These new materials enhance wearer safety when exposed to high heat and flame loads.

### Backward Compatibility

Approved for use with the latest 3M™ Scott™ Air-Pak™ X3 Pro SCBA, the AV-3000 HT facepiece also provides backward compatibility for use with older model 3M™ Scott™ Air-Pak™ SCBA meeting the 2013 Edition, 2007 Edition, and 2002 Edition of the NFPA 1981 standard.

### Improved Voice Intelligibility

Redesigned voice communication components deliver enhanced voice intelligibility, exceeding the requirements of NFPA 1981, 2018 Edition. The dual voicemitters provide a sphere of intelligibility to those around the wearer, not just those directly in front.
